Conservation Tillage and Cropping Systems Workgroup

Conservation Tillage Survey
February 7, 2011

California Garlic & Onion Symposium
UC Cooperative Extension
Tulare, CA
Conservation Tillage:

no-till, strip-till, ridge-till or mulch-till systems that conserve at least 30% soil surface residue, (“classic” forms of CT), or systems that reduce overall tillage passes by 40% or more
We ask for your help in completing this survey which should only take a few minutes. Your feedback will help us to better plan our research and extension programs.

Thank you very much for your time.
